Revision 2.X 12/07/2021 – Added Bang/Bang – (not very useful)

This documents which Java/C++ WPILIB routines have been duplicated in LabVIEW, and which ones are not needed (for example because all that is needed is a cluster unpack function), and what isn't done....yet...

| Part |

Doc completed Pct 88.66% Optimization Pct 52.36%

Optimize legend: S = Subroutine, I = Inline, X = reviewed, nothing done. (In some cases, after sufficient debug and use, additional optimizations could be considered.)
